CORAVIN

The most revolutionary in the wine world since the corkscrew is definitely Coravin. Through an ingenious system where a cannula needle penetrates the cork, you can pour the wine from the bottle while filling the void with the heavy noble gas argon.
The scent and taste neutral gas protects the wine residues in the bottle against oxidation.
All this happens without the cork being removed.
The wine can thus remain in the bottle for several months.

Smart and a great success!
